Travel Journal README

CS546 - Final Project - Group 1

How to run the project?

Initial Setup

- Download dependencies using " npm install " in the same directory as your project, through your terminal.
- Execute the command "node server.js"
- Once the server is running, access localhost:3000 on your browser.

Website walk-through

- Once on the ' / ' route page, scroll down to find the "Login and Register" links.
- Select the Register link, to register for a new account. You will be redirected to the signup form.
- Complete the details in the signup form.
  Sample values:
    - Email Id: vedant@gmail.com
    - First Name: Vedant
    - Last Name: Achan
    - Password: 123@phil
    - Confirm Password: 123@phil
- On successfully completing the signup form, you will be redirected to the landing page. (As you just created a new account, there are no visible trips in the landing page.)
- Now create a new trip by clicking the "create trip" option on the navigation bar.
- Sample details to create trip:
    - Trip Name: TGIF
    - Trip Location: NYC
    - Trip Date: 2015-04-29
    - Add members: mehulgupta29@gmail.com
- You can now see the newly created trip on the landing page.
- Add photos / Add experience by selecting the "photo" option on the navigation bar.
- Drag-and-drop photo on the upload photo region and click upload to upload it.
- You will now see your uploaded photos in a carousel.
- Click any photo in the carousel to add comments to it.
- In the comments page, add a comment to the photo, or change the caption of the photo.
- Select Logout option from the navigation bar to logout.
- You can now login directly using your credentials. Alternatively you can also login using Facebook or Google+ account.
